To maximize your cat’s experience with the Pure Commotion toy, we’ve included the following helpful hints. Because each cat has its own distinct preferences when it comes to play, we recommend that you observe your cat’s reactions and modify for your own pet.

1. Begin by introducing your cat to the feather toy attachment by dangling it from your hand in front of your cat before attaching it to the Pure Commotion toy. Let your cat smell the feathers and familiarize itself with the toy.

2. Cats love unpredictable movement (it’s how prey moves in the wild). Experiment with the speed control dial to determine what kind of movement your cat responds to best.

3. While supervision is ALWAYS recommended with any cat toy, some cats will play more aggressively if they think they are alone. If your cat fits into this category, leave the room and peek around the corner to keep an eye on the fun.

4. Watch the action get certifiably insane by storing the toy attachment in petlinks Organic Catnip.

WARNING: Do not turn the metal arm on the motorized column clockwise by hand as it will result in possible damage to gears. As with all pet products, close supervision is recommended. Never allow your cat to bite off or swallow any part of any toy.

The petlinks system helps you understand that your cat’s well-being is a composite of 12 diverse needs. We help you connect all the pieces with a veterinarian-approved, color-coded product system that helps you meet each of those needs. For more information about petlinks products, visit [www.petlinkssystem.com](http://www.petlinkssystem.com).
Thank you for purchasing the petlinks™ Pure Commotion electronic activity toy.

Our Pure Commotion toy is a perfectly fun way to encourage healthy activity in all cats. Because feline longevity and quality of life are tied to healthy weight levels, the Pure Commotion is a small investment in your cat’s happiness and well-being.

petlinks’ Pure Commotion toy is the next best thing to a membership at the local kitty gym. The erratic movement of the Pure Commotion is so fun and irresistible it gets even the laziest cats moving in the right direction. The plastic wand with the tempting feather toy attachment swivels and bends unpredictably — driving cats crazy!

For more information about the Pure Commotion electronic activity toy, visit www.petlinkssystem.com.

Playing with a toy is important to maintain weight. Active cats have lower body fat and are less susceptible to diabetes and heart disease. The Pure Commotion makes playing fun for your cat.

GETTING STARTED
1. Remove parts from box (figure 1).
   a. Base unit
   b. Motorized column
   c. Plastic wand
   d. Feather toy attachment with wire extension
2. Install (3) AA batteries (not included) in battery box of base unit.
   a. Use thumb to remove battery box cover.
   b. Push in batteries, ensuring correct polarity of batteries (+/-) in box.
   (Note: May use either standard alkaline or rechargeable batteries. Do not mix battery type).
3. Open the four stabilizer bars at the bottom of the base unit (figure 2). To open, gently lift stabilizer bars over the rubber skid feet. While looking at the bottom of the base unit, rotate bars counterclockwise and lock into place.
4. Connect motorized column to base unit. Locate the pointed arrow on the bottom edge of the column and line up with the large slot on the base unit (figure 3). Turn column clockwise and lock into place.
5. Unclasp the closure on the feather toy attachment with wire extension and hook between the two round balls on the plastic wand (figure 4). Securely re-clasp closure.
6. Slide plastic wand with feather toy attachment onto column wire (figure 5). Check to be sure it is securely attached.

TIME TO PLAY
1. Familiarize yourself with the simple controls on the base unit of the Pure Commotion (figure 6).
   a. TIMER (left side)
   b. SPEED CONTROL (middle)
   c. ON/OFF (right side)
2. Push the ON/OFF button to start the movement. Pushing the ON button one time will result in continual movement. (Use the TIMER button to limit the time to a pre-set number of minutes).
3. Push the TIMER button to control duration of play. The toy can be programmed for 15 minutes up to 2 hours of continuous play. To set the timer, push the TIMER button once for 15 minutes, twice for 30 minutes, etc., up to 8 times for 2 hours (figure 7). To reset TIMER, press the ON/OFF button.
4. Turn the SPEED CONTROL dial clockwise to increase wand speed, counterclockwise to decrease speed (figure 8).
